

# DAIKIN AIRBASE

## CONTROL AT YOUR FINGERTIPS

Daikin Airbase<sup>1</sup> puts your system's frequently used functions at your fingertips with an easy to use app.

In conjunction with Daikin's BRP15B61 wireless LAN adaptor, the Airbase app lets you use your smartphone or tablet<sup>2</sup> to operate your air conditioning unit via your in-home Wi-Fi or remotely with an internet connection.

Up to 10 systems<sup>3</sup> can be conveniently monitored and controlled on the app anywhere, anytime.

## THREE WAYS TO CONNECT

### 1. DIRECT CONNECTION

For locations without a Wi-Fi network, the app can wirelessly connect directly to a WLAN adaptor equipped air conditioner, when in range.

### 2. WI-FI CONNECTION

A WLAN adaptor equipped air conditioner can easily be joined to a local Wi-Fi network. Once connected, the system can be controlled from any networked Android or iOS device.

### 3. INTERNET CONNECTION

Monitor and control your system from virtually anywhere, adjusting temperature and setting for a comfortable environment ready for when you arrive home. With no subscription costs from Daikin, all you need is a permanent internet connection for your Wi-Fi network, and an internet connection for your phone or tablet.

<sup>1</sup> Airbase is compatible with SkyAir systems and VRV ducted models only

<sup>2</sup> Only compatible with Android (≥ 5.0) & iOS (≥ 8.0) devices

<sup>3</sup> Each ducted system requires a BRP15B61 adaptor and must be connected on the same Wi-Fi network
