Gree Free Match Multi Split System

Why Choose a Gree Free Match System?

The Gree Free Match System provides the flexibility of heating or cooling your entire home or office with up to five indoor units with just one outdoor unit. This means less noise and less space taken up by large outdoor units all powering multiple indoor units. The indoor units can be different types and/or capacities which means you can customise your heating and cooling needs specifically for your home or office.

For example you can choose a 5kW Floor Console for your lounge, a 2.5kW Lomo Hi Wall for your master bedroom and a 3.5 kW Cassette for your kitchen and they can all be run from one outdoor unit.

This allows you complete temperature control over your entire home or office environment which gives increased comfort and greater energy efficiency.

All Gree Air Conditioners are fitted with Gree's G10 Inverter Technology.

Inverter air conditioners are more powerful and more energy efficient than fixed speed air conditioners. Gree G10 Inverter's use highly sensitive signal processors to vary the speed of the air conditioner to match the temperature required. When the desired temperature is achieved, the G10 Inverter technology ensures it's continually maintained with minimal noise.

What Are The Benefits of the G10 Inverter Technology?

Greater Power Savings

The G10 Inverter can save approximately 20% more power year on year compared to a fixed speed air conditioner. In addition to this, Gree Air Conditioners use less than 1W of power in standby mode.

Low Noise

The Gree 180° Sine Wave DC Speed Varying Technology offers precise control giving continuous operation and accurate temperature stability. By operating over a wider frequency the compressor is less stressed giving superior reliability while offering lower noise levels.

Increased Comfort

The superior control of the G10 Inverter means that even in extreme outdoor temperatures, the air conditioner will maintain the set temperature within $\pm 0.5^{\circ}\text{C}$.

Controlling the Gree Free Match System

Each indoor unit has its own controller, this means you can perfectly customise the temperature in each room without affecting the other rooms. Hi Wall units have remote controls and the Cassette and Ducted have wall mounted controllers.

Factory WiFi

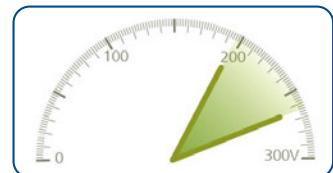

Wireless Remote Control

With built-in WiFi, you can control your Lomo Hi Wall or Floor Console Unit from your mobile phone or tablet.

Information for Installers

Wide Voltage Range Operation

The Gree Free Match System can operate safely within 198V and 264V which means that voltage variations are less likely to cause damage.

Auto Restart

The indoor units will automatically restart with the same mode and fan settings after a power outage.

Outdoor Units

	Model	Unit	GWHD(18)NK3JO	GWHD(28)NK3JO	GWHD(42)NK3JO

Remarks:

- Because of the continuing improvement on product, all specification are subject to change without prior notice.
- Above outdoor units specification is according to a fixed combination with Lomo indoor Series withch comply with AS/NZS 3823
- Above outdoor units are standard with DRED mode (Demand Response Enabling Device) which comply with AS/NZS 4755.

Indoor Unit Selection

Note

Indoor unit selection is based on a minimum of 50% to a maximum of 150% of the outdoor units capacity.

If synchronous operation is required then we recommend a capacity ceiling of 100%.

21k or above indoor units are not recommended for use with either the 18k or 28k outdoor units.
